Hosted and participated in international multi-center, national, provincial and ministerial level teaching and research projects, and participated in writing, revising and discussing many national and industry standards.

The worldwide spread of COVID-19 is having a large impact in everyone's lives. Over the past few months China has been battling the spread of the virus through a unified campaign linking together government, medical professionals, businesses and the public. Mindray, as the leading medical device company in China, has been at the forefront of this battle. We have been increasing production capacity, working with medical professionals on improving diagnosis as well as treatment, and supplying much-needed medical equipment to the hardest-hit areas such as the HuoShenShan Hospital (centered in Wuhan City).

Mindray has also gained valuable knowledge and experience related to the COVID-19 that we feel would be beneficial for you. This is why we would like to hold a series of webinars for the purpose of sharing this experience with you through the most accessible way.

For this Clinical Diagnostics Webinar, we are honored to invite Prof. Chuanxin Wang, Dean of the Second Hospital of Shandong University, Prof. Ming Guan, Director of Central Laboratory of Huashan Hospital Affiliated to Fudan University as well as Prof. Xuejing Wang, associate professor of Peking University Health Science Center to share their valuable knowledge on the diagnostics of COVID-19. We hope this webinar will greatly improve your understanding of COVID-19 and provide you with guidance on how to react to the disease from a clinical professional's perspective.

Time(Beijing Time)	Topic	Speaker
20:00-20:05	Introduction of Speakers & Topics	Prof. Chuanxin Wang
